SUMMARY

Specializing in IoT-integrated mobile applications, I have transitioned into software development. I build cross-platform apps using MQTT and API integration to connect Flutter frontends with hardware, such as smart cameras and home automation systems. I'm an early adopter of AI-assisted development workflows, translating customer requirements into functional, production-ready features.

EXPERIENCE & PROJECTS

● Real Tech Systems | Real Tech GPS - Perundurai, Erode

Junior Flutter Developer | 2024 Nov - Present

Core Project: IoT Monitoring & Automation Suite (GCam, iSafe, iWS, iTank)

- Built a suite of MQTT-integrated IoT applications covering water tank/motor control (iTank – real-time level monitoring, remote ON/OFF, alerts), smart camera monitoring (GCam – garbage/person/vehicle detection, live streaming, remote audio alerts), home automation and security (iSafe – remote door/appliance/alarm control, multi-user access), and smart weigh bridge monitoring (iWS – vehicle identification, automated reporting).
- Additional IoT Projects:** GeoCamera, Autobell, iChlorine, RTGPS, and internal office management apps.

App Deployment & Testing

- Managed end-to-end app publishing on App Store Connect (iOS) and Google Play Console (Android).
- Performed manual testing on development builds across both Android and iOS platforms, including closed, internal, TestFlight testing to validate app functionality and identify issues before release.
- Technical Stack: Clean Architecture, MVVM, MVC, SharedPreferences, Firebase Cloud Messaging (FCM), Responsive UI, Performance Optimization, CI/CD.

Challenges and Cross-functional Support

- Resolved Android-specific issues in Android Studio for the iFace project, ensuring platform-level stability.
- Supported DevOps and backend teams during server migration – assisted with service deployment on new servers using Docker and Nginx (basic configuration).
- Worked with Node.js and Express at a basic level, developing small APIs and assisting with backend corrections and integration tasks.

AI-Assisted Development & Planning

- Integrated Ollama with Qwen models (offline), along with free online AI models, Cursor, and Claude, into the development workflow using OpenCode IDE, accelerating project delivery and significantly reducing development time.
- Produced Low-Level Design (LLD) and High-Level Design (HLD) documentation for select projects.

● ABE Semiconductor Designs - Tiruchengode & Chennai

Junior Flutter Developer and Consultant | Apr 2024 - Sept 2024

- Started in a support role, then moved into Flutter development as the team needed mobile app support.
- Designed UI/UX and supported development of a full-featured food ordering app.
- Explored AI/ML fundamentals using Python in Google Colab alongside core development work.

Personal Projects

- Meta OAuth Integration:** Integrated Meta/Instagram APIs for authentication and backend data integration.
- Wealth management app:** Built an automated SMS parser to detect and log transactions, handling Android permissions and pattern matching, with Google Drive integration for automatic backup and sync of the stored data.
- GPS QR Map Camera app:** Built a camera app that tags each photo with GPS location and a scannable QR code.

SKILLS

- Flutter & Dart (Cross-platform, iOS & Android)
- State Management: GetX, BLoC, Provider
- IoT & Real-time Communication: MQTT, BLE
- Backend & Data: Firebase, RESTful API, Node.js, Docker (very basic).
- Testing: Postman (API Testing), TestFlight, Manual QA
- Version Control: Git & GitHub
- UI/UX Design: Figma, Canva

EDUCATION & CERTIFICATIONS

MBA - 8.42 | B.COM - 7.94 | HSLC - 92.3% | SSLC - 88.6%

Certification: CSC Frontend Course, Udemy Flutter UI Bootcamp, Udemy Flutter Masterclass
